

Secrets to a Successful Automation

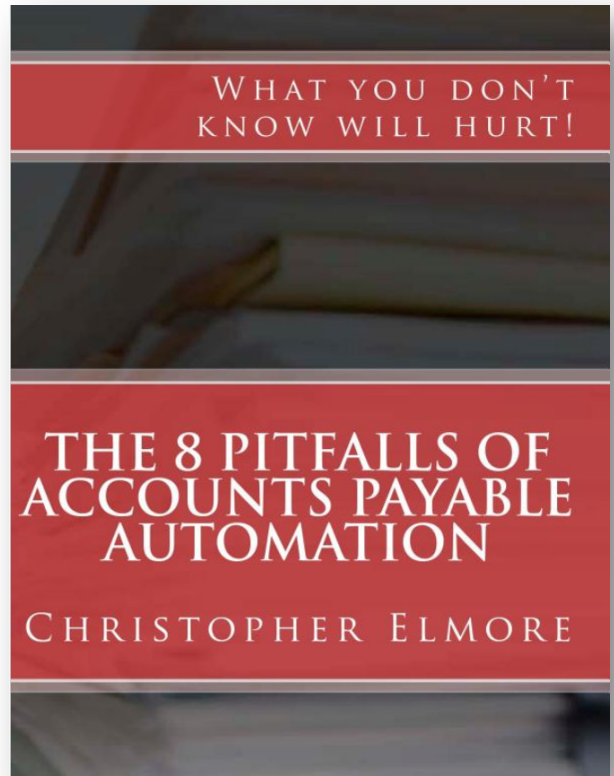

Based on the bestselling book [The 8 Pitfalls of Accounts Payable Automation](#) this session will give people insight to what life will be like going from a paper process to a fully automated process. What you don't know will hurt you when automating an accountings process. This session will help navigate people through the jungle and keep you out of the pit!

Each person attending will receive a free book as well as practical advice, stories and questions to ask about automating to get a company started on an automation plan or help a company improve their current automated process.

Chris has been helping companies go from a paper process to an automated process since 2000. Chris has worked in help desk support, training, project management, consulting, product design, testing, sales, and strategic management.

Gaining experience from the real world with real clients, Chris has found a unique ways to communicate the need for vision and planning when automating. His experience has culminated in the publishing of "The 8 Pitfalls of Accounts Payable Automation"(04/11) and, "The Argument to Automate, How Innovation Can INSPIRE Not Fire" (03/12). Chris's third book, "The Check is in the Mail? Payment Automation for the Real World" is set to be published in May of 2013.

Chris lives in Charlotte NC where business, 4 kids and a wife keep him very busy.
